TRIP

" THE TRIP PHILOSOPHY "

→ Many philosophies try to explain about existence, they give diff. arguments and diff. perspectives. So here I am presenting my attempt to solve the mystry of existence by my philosophy or you can say under developed or bud philosophy.

My Philosophy explains itself mostly in its name that is Trip. Q. What is Trip? It is movement of us from our existing place to another place to spend a amount of time there and then come back to our existing place again. We do Trip for diff. reasons and diff. purpose / purposes. Sometime we trip alone to a alone place, other time alone to not alone place, and we trip with some people we make / have some relation to to alone or not alone place. So, all this elements combinely makes a trip.

Trip?

Now, lets discover it further. 1stly we we trip, and in compare to real life it is why we exist? It can have many explainations like biological, chemical, philosophical, etc.

Reason

Reason to Trip

But as we are talking to clear our reality, we should leave it as mystry that can't be fully solved. because if you give biological reason that ~~we~~ we make ourselves to contine our speices, then there is a counter argument that if we exist because we want to exist and it is wired in our brains to exist by making new being just like us then isn't it should only apply to species other than human, because as humans we can think more than survival, they why shouldn't we do a mass sucide and get free of all the problems ~~at~~ at once. So, here biological reason fail to define clearly because if we exist because nature of our species want us to than we are obiously more developed to think and do it than other species. Q. so, why we exist then? because we are droped here to exist by means of other human being like us. But we can't live thinking like that, so we need to make a little

Reason of trip

story to satisfy ourself. so, my story is that our soul existed somewhere in some form, but it got bored and want to have a change in place, so it decided to go on a trip to earth. And here we are, ON EARTH. Our question regarding reason of our existing is solved. Now 2nd question, who are we, so we are just cloths of soul that it got ~~by~~ randomly and with the help of these cloths, our ~~body~~ soul will have a more fearful expirence. 2nd question also solved.

Who we?

Now one of the biggest question of our ~~mankind~~ mankind.. Now, what should we do here? or in common language, ~~what should be o~~ what is our purpose? every philosophy tries to solve this que, and so does my. My philosophy says that 1stly we are here for a limited amount of time, we can't be here forever. so, either you have best expirence or worst or moderate, you will have to go. doesn't matter who you are. Now, you know that you are here for a limited time the 2nd thing that comes is what will you do here?

Basic purpose

diff. people do diff. things here, sometimes you choose what do ~~you~~ you want to do and other times you are not able to choose due to diff. reasons. and in some cases, you don't have ability to even choose. But there is one common thing in all of them travellers, that they all we have a "expirence" every traveller will experience something. Sometime they can decide what they want to experience and other time they can't. But decideable or not, everyone will atleast have a experience. Now there are two type of factors in trip. 1st decidiable/controable 2nd Non controable. There are factors like weather, strike, population (etc), etc that we can't control. so if we can't control, then we can be angry about it or try to enhance or experience and get best out of our trip by making controbale favor work in our favor. examples of controable things are planning where to go, where to stay, etc. Just like

Main purpose

Two factors

Successful Trip 2.

controable thing is a very important factor, there is ~~equally~~ another equally important realisation and that is each individual is different so each individual will have a different meaning of successful trip, sometimes they could be same other times they could be fully contradictory and there is also exist in between (diff. ~~meaning~~ meaning of successful trip for everyone means that defination of a successful life will be ~~individual~~ individual personal based). Now generally people becames companions by two things in this trip. 1st by bound together, in it, people are bounded together ~~with~~ by family, caste, society, place of living, etc. This bound is because a new traveller can't trip without initial help, so generally he/she was get bounded by the ones who helps him/her as guide. 2nd, by self choice, after a traveller spends some time with other people than bounded companions, they try to other traveller

Companions

companians

whom they seem like they are same or interesting. In some of this talks they became non-bounded companians which we call "friends". They are made by our choice and they are removed by our choice. Friend is the most wide and umbrella category that can consist other sub categories. Non-bounded companians also have other kinds in it like lovers, teacher student, Landlord borrowes, lord worker, etc. These are not 100% friendship, 1st category is romantic friendship, other than 1st category all are professional relationship that people makes to benefit one another.

purpose

We have talked about basic purpose, two factors and companians. Now let's talk about purpose in detail.
[What are we suppose to do here?]
→ Generally the society makes a normal person so busy in random bullshit that they don't even ask this question and do what the society says.

We have come as a free soul who wanted to have some civil experience on earth but rather we are putted into a factory that works on a ~~ridged~~ riged system".

Our basic purpose was to experience, and to experince more we needed to explore but after people started to have a difference between civilised and un-civilised, they became so addicted to the race of being more and more civilised that they made explore & exp. a 2nd purpose and the factor system 1st purpose.

There a diff. types of exp. and every traveller would want to have as much experience as he could have. A succesful trip of an individual will have all the exp. he wanted to exp.

So, what is the sol^{n}? → Acceptance that the world is now a factory and even if want to leave this factory by escaping to nowhere, we still need to give back to our bounded and non bounded companians what they owe us.

The sol^{n} will be to 1st know the Reality and the Real Reality is we are not here to work in factory, we are here to explore and experiance. 2nd Accept the current situation that the world is a factory system now and we need to master it if we want to live with our companians, people in this time try to feel the Real Reality by fake escape, they watch TV, series, eat good food, go to small trips, etc, etc just to escape the factory system for some amount of time 3rd Live in Dual Reality, The situation is our trip is to a factory so what we can do the best is to explore the factory and then Rule it while exploring and working in it at the same time. In other words, The Real Reality is our basic purpose that is explore and experiance and the fake reality is factory system that says that you have to just earn money and provide for your family and spend money in things that will

show off your wealth. so what should we do in this situation? The best way to live the ~~Reo~~ Real Reality can only be achieved when you conqure this factory system, the worker just work all the time in factory and have no time for exploration whereas the owner works a litte after he conqured and then has all the time and resources for exploration & exp CEO. so To live a basic human nature life in today's time is to conquer factory system or be successful. Now here is the trap, most people forgets that the are doing it to get to Real Reality easily or most people generally don't know the Real Reality but either of them gets "gachh" in race between workers of factory system and forgets the goal of it. It is not completely their mistake because the factory system is designed to make you forget the Real Reality and make you work in factory more so you can earn them Real Reality. and technically they are conqureers.

Right way to conqure

And you need to be like them, you need to be a conquer.
Now, fuck everybody, what plan you should follow to conqure and work towards conquring without getting gachi in factory system. Need to know 2 things, 1st. Conqur meaning? 2nd Real plan (1st) conqure meaning is to get free from the things that restrict you from the Real Reality. For it the 1st way is 'रोजगार' but the problem is that you will not be able to give back what you owe to the ones you should give back to. 2nd way is be successful, ~~wheels~~ that means be free from financial restrictions, give enough time to companions and 3rd & most imp → Give most time to yourself. Conqure doesn't mean to became financial strong only, it means to be free from restrictions and have power to do whatever you want to do. ~~And~~ EE (exp & exp) ??
→ It doesn't only mean physical

Conqure

exploration & experiance of some place (travel). It has greater meaning. It is the basic purpose and nothing in the world except Realising and living the basic reality and accepting and enjoying it by whole heart can give you the Real fullfillment. writing this ~~peice~~ piece of philosophy is also tt, spending time with your lover is tt too, having to face sadness is also tt, Being with your family is am tt too. In fact everyone experience something. So where is the problem? The problem is that the above listed tt are real tt which most human kind should spend time on but the factory system fucks it all by giving fake tt labeled as Real, like watching movies, watching vlogs, watching pornography, eating fast food. These are modern day escape tool. Music, Books, etc are old days escape tools, old ones are less harmful than modern ones. All this fake tts give sense that person

is doing Real tt. But after doing these fake ttes, a person gets back to reality and find himself all alone hollow and the other ~~people~~ fakes ttes like insta, snap, yt, fb, makes person see a fake reality that he is the only one who is alone & hollow and everyone is having good life. Now this factory system makes him to let him show to the world that he is not hallow & alone by copying and posting fake realities to the world. It is like a room full of people where everyone is dressed like a millioner but in reality only one or two of them owns even a house. So, tt means to exp. and explor what you want to exp & explor not what the world tells you to. For one person, his/her tt can be spending time in nature and for other it can be spending time alone or with family or friends and

for someone It can be taking knowledge and for someone It can be just looking into ~~starts~~ stars EE should only what you feel, not what factory belives you should feel and do. If you want to exp speed then buy a car, here It doesn't mean that you are doing It for factory, here It mean that you want to exp. something which you can exp. easily through some producted made by factory, another example is you want to make changes for you companies or even non-companies, but you are in a factory and here everything runs by rules that the factory decided, so now you need to get to the position where you are able to decide rules and then help in making them with help of other ~~factory~~ UPE minded people, here also you are not a slave of factory but someone who want to achieve his EE And did it by way of factory. EE can be anything because EE is more

emotional then physical. Physical is what is ~~seen~~ seen and it give indication to the existence & fullfillment of your EE. but after you see your EE's fullfillment, only thing that Remained is your emotion / feeling. And after multiple ~~exp~~ EE and feeling them, it starts to saved in you in the name of memory and affect you upcoming too. And Memory is the only thing you have at the end of your trip.

~~[illegible]~~ one more things to note is that 1st EE is not bound by any rule/law/ ethic of factory system. ये ना नैतिक है और ना हि अनैतिक, ये बस A piece of existance है. example, for someone, his EE can be to help people and for other his EE can be murder people, In rule of society/factory it is wrong because rules set by factory but it may not be wrong or Right in a true way because it can't be नैतिक or अनैतिक.

So, In the end conqure not only

means to just earn money and then do big expenses, If you think that it is the right conqure then you didn't understood the philosophy. Conqure means to get free from restrictions and do your tt.

~~Long~~ Conquring can't be done in one day, it is a long long process, so you can't just wait to get free from all restrictions tommorrow, it will take years. Does that mean that you need to just conqure till you get free from all restrictions? NO, if you do that, your already short trip will become more short so you need to work in factory and conqure it slowly fast while you are doing Real tt also and some fake tts too. As more you go towards ~~conqure~~ conqure, increase Real tt too. Like a Balanced life. You should make your daily, weekly, monthly structure like 70% factory work to conqure, 25% Real tt, 5% fake tt. Then only you will have a nice trip

Reality Check

To sum this beautiful philosophy,

Life is like a trip that your soul went to with the purpose of exprience and explore but got trapped into a riged system of sodety that work like factory and neglects all the wishes of innocent soul and give it fake wishes to work upon till the death of body. So to not get trapped, one need to conqure this factory and find the Real tt, his/her soul wants and then do it in parallel to conquring. And if everything goes Right, you will have conqured the factory, experienced and enjoyed most of the Real tt that you want to and had companions to share your emotions & joy.

My Best wishes to the Reader.
